ABOUT US

Kids-N-Technology is a K–8 STEM enrichment company located in Charlotte, North Carolina. Our robust curriculum and passionate educators challenge students to imagine what is possible and set out to achieve it! We offer innovative STEM and STEAM enrichment programming to schools, community learning centers, and faith-based organizations to develop creativity, communication, collaboration and critical thinking skills in elementary and middle school learners.

Early Learning Program: In K-2nd grade, KNT empower young learners' curiosity through inquiry, exploration, and discovery! Students engage in STEAM foundational classes such as animation, storyboarding, and hands-on science.

Primary Program: In the elementary years, grades 3–5, students benefit from our unique project-based learning model as they make significant connections between their core academic classes and enrichment activities. Such as coding, game design, and robotics robots.

Middle School Program: Students in grades 5–8 learn to actively use their knowledge as a tool and venture into unique courses like advanced computer science and engineering.

Through teaching, research, and community engagement, our rich heritage and current multicultural student-centered focus provide a firm foundation for its endeavors. It serves the needs and aspirations of individuals and society, producing students for STEM and STEAM careers, leadership roles and life-long learning.
